Face neck and décolleté

R2300

SKIN LESION REMOVAL WITH LAMPROBE

It is a non invasive process that uses a device that utilizes radio- and high-frequency with a needle to evaporate and kill the cells where there is excess growth.

The treatment is growing in popularity not only for it's effectiveness but also non-invasive technique as I only work on the affected areas no matter how small.

- Broken capillaries
- Acne pimples
- Seborrhic keratosis
- Sebaceous hyperplasia
- Discolouration from sun damage
- Skin tags
- Milia
- Xathelasma
- DPN

ELLIPSE IPL

FACE REJUVINATION

The Ellipse IPL (Intense Pulsed Light) system treats sun-damaged skin by using selective photothermolysis, a process where specific light wavelengths target and destroy pigmented lesions or vascular irregularities without harming surrounding tissue.

FACE (Sun damage & Rosacea)

Full face	R850
Face and neck	R1100
Decollete	R900
Hands	R350
Veins (face)	R80 PER SHOT

ELLIPSE IPL

PERMANENT HAIR REMOVAL

The Ellipse IPL system emits pulses of filtered light that are absorbed by the pigment (melanin) in the hair shaft and follicle. The absorbed light energy is converted into heat, which travels down to the hair root (bulb) and stem cells in the follicle. This heat damages or destroys the follicle's ability to regrow hair, leading to long-term hair reduction.

Hair removal - Body

Lip

R190

Chin

R280

Lip & Chin

R380

Half arm (excl elbow)	R600	Hollywood (all off)	R 900
